## 📄 PROFILE

Experienced IT professional specializing in developing and implementing security solutions within fast-paced environments. Proficient in React Js and Node Js, consistently delivering exceptional support for risk management initiatives. Adept at navigating complex technical challenges to ensure optimal security measures are in place. Passionate about staying current with industry trends to provide cutting-edge solutions for clients.

## 🧠 SKILLS

### Programming Languages:

- C, Python, Java

### Libraries/Frameworks:

- Javascript, React, Node, express, Django

### Tools / Platforms:

- Git, VS Code

### Databases:

MongoDB, MySQL

## 📁 PROFESSIONAL EXPERIENCE

### STL- Sterlite Technologies Limited

Project Intern

01/2024 – 04/2024 | Ahmedabad, India

- Developed RESTful APIs using Flask framework to handle requests and responses for a Text-to-Speech (TTS) web application. Collaborated with the frontend team to integrate the Flask APIs with the React-based user interface, ensuring seamless communication and data exchange between the server and client. Assisted in debugging and troubleshooting issues related to API endpoints, database queries, and frontend-backend interactions, ensuring smooth operation of the application. Gained valuable experience in full-stack web development, including frontend technologies such as React and backend technologies such as Flask, as well as database management with SQL.

### Epitome Corporation Pvt Ltd

Webpage developer

06/2024 – 09/2024 | Ahmedabad, India

- Skilled in planning and executing virtual events, providing end-to-end client support, and leveraging interactive webcasting tools to enhance audience engagement. Adept at building strong client relationships and ensuring seamless event delivery.

### Skyline Security

Software Security Engineer

10/2024 – 03/2025 | Ahmedabad, India

- Network Security & Traffic Analysis: Experienced in packet tracing to monitor, analyze, and secure network communications. Application Debugging & Enhancement: Proficient in identifying and fixing issues in React.js applications, optimizing performance, and redeveloping features. Software Support & Database Management: Skilled in troubleshooting software issues and utilizing SQL for data analysis and problem resolution.

## 📁 PROJECTS

### Construction Website

React Js, Node Js, Express Js, MongoDB

- A modern construction company website built with React, Node.js, and MongoDB (MERN stack). It features a responsive design, project portfolio, contact form, and admin dashboard. The site allows easy management of services and showcases completed projects with a fast, SEO-friendly interface.

## EDUCATION

### **Bachelor of Engineering**

L.J. Institute of Engineering and  
Technology (L.J.I.E.T)  
Ahmedabad, India

### **H.S.C Degree in**

GYANBHARTI SCHOOL  
Junagadh, India

### **S.S.C Degree in**

GYANBHARTI SCHOOL  
Junagadh, India

### **E-commerce store**

Javascript, React, Django

- Dynamic and responsive front-end design for an immersive user experience. Seamless integration of React components, enhancing interactivity and user engagement. Backed by Django, ensuring a robust and scalable backend for efficient data management. Advanced features like real-time product updates, personalized user accounts.

### **Hotel management system**

C language

- Implemented efficient data structures and algorithms for room booking, ensuring optimal performance. Integrated a secure authentication system to safeguard sensitive information.

## CERTIFICATES

- C for Everyone: Programming Fundamentals- Coursera.
- Exploratory Data Analysis for Machine Learning- Coursera.
- HTML, CSS and JavaScript for Web Developers- Coursera.
- The Structured Query Language (SQL)- Coursera.
- Data Structures- Coursera.
- Ethical Hacking Essentials (EHE)- Coursera.
- CSWAE- Certified Secure Web Application Engineer- Cyber Flare.
- Back-End Development with .NET- Coursera.
